

Remarks

- All resistors are 1 watt metal film 1% unless otherwise marked. Non-magnetic preferred. Except 100 Ohm which are 1/4 watt metal film 1%
- For a single ended input, short the "-" input to gnd.
- Overall gain will be 20dB with trimmer P1 set at 180R for single ended input – or 350R for differential input.
- Set trimmers P2 and P3 to obtain an equal 260V at the 6H30 anodes (circa 220R).
- Heatsink Q4: 3-4 K/W
