

Marshall® 1960 4x12 slant cabinet (4x10 dimensions in red)

Cabinet is constructed from 5/8" Baltic Birch (11-ply, void-free) or similar plywood. Front edge of cabinet is "thickened" with strips of fir or pine, approximately 3/4w x 7/8d". Thickness of front edge, including levant (vinyl) is 1 15/32". Allowing 1/32" for levant, fir strips should be 13/16"

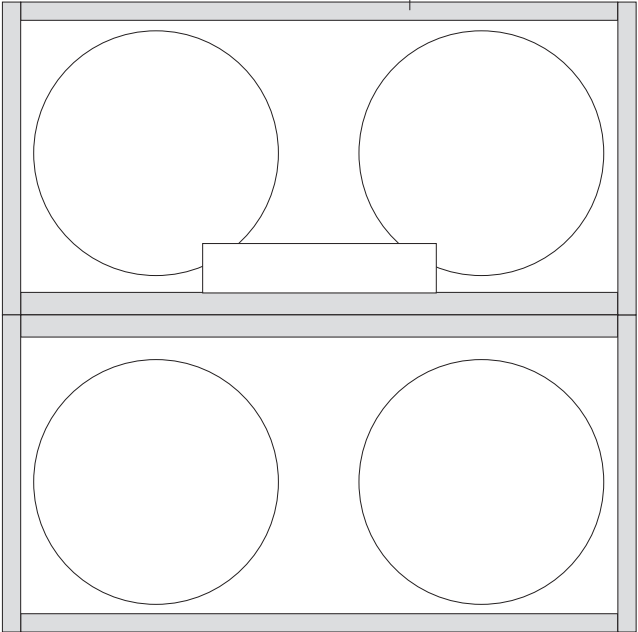

Note - baffle is cut 1/4" smaller (1/8" each edge) than the inside dimensions of the cabinet to accomodate grill.

Baffle Detail

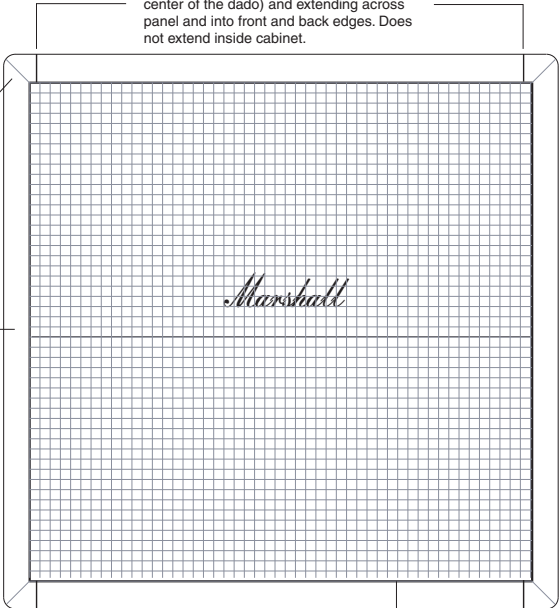

1/2" frame extends around perimeter of baffle and across the center. This "floats" the grill off of the baffle

"Skinny" gold piping inside 1/8 x 1/8" dado, cut 1 11/16" from edge of cabinet (to the center of the dado) and extending across panel and into front and back edges. Does not extend inside cabinet.

Levant is cut at 45° angle and stretched over corners. It is stretched (no cut) over beginning of slant

White piping stapled to inside edge of cabinet (frames grill).
